

SS Winner Queen Creates the Ultimate Cruise Experience with WESMAR Bow Thrusters

Winner Tours is a legendary company in the eastern United States. The company has been in business for one hundred and fifty years, and specializes in offering the finest amenities to its clients including dinner dance cruises, and gulf stream fishing.

The Royal Winner Queen is the most recent addition to the Winner Cruise fleet. The boat is a 400 passenger vessel based in Wilmington, North Carolina. The Royal Queen was designed to provide a pleasant cruising experience (low noise, and easy maneuverability) while providing an exciting tour so Winner went looking for bow thrusters.

"We were interested in an Electric bow thruster because the hydraulic versions are too noisy," Skeets Winner of Winner Tours says. "With a 60 horsepower unit the propeller would get messy and we would lose full thrust."

When Winner decided to

The WESMAR DPC 100 HP AC Bow Thruster system provides Quiet comfort and maneuverability to the passengers and crew of the 103' luxury party boat, Royal Winner Queen.

pursue electric thrusters he All research boats are electric asked the people at Service drive now." Marine for their opinion. Brent Winner decided to purchase Warbrink is an installation a WESMAR 20' 100 hp DPC for veteran, and his abilities with their Royal Winner Queen and the WESMAR thruster has AC electrification are well- been a real success. "We like respected. He felt the adaptability of the AC systems it real well," Winner says. was important.

"AC systems have become very popular," Warbrink says. "They have good propulsion and less maintenance, and they will go into smaller units."
