

Burr Yacht Sales: We Absolutely Recommend The Vortex!

Burr Yacht Sales of Edgewater, Maryland, is the world's largest seller of new and pre-owned Fleming Yachts. The company is three and half decades old, about the same age as WESMAR, which is the world's leading producer of bow thrusters and roll fin stabilizers for mid sized yachts.

Both Burr and WESMAR have a strong and loyal customer base throughout the world, and both have a specialized knowledge of the boating industry that allows them to produce quality workmanship. It's no wonder they have found each other.

Burr Yacht Sales is located just twenty minutes south of Baltimore-Washington Airport in Edgewater, Maryland and they have installed many WESMAR systems over the years with great success.

They were one of the first to install the new WESMAR Vortex bow thruster.

They installed it on a 55 Fleming Pilot Motoryacht and Patrick Flattery, Service Manager, is extremely pleased with the results. "The new Vortex thruster works wonderfully. It definitely feels like it has more thrust and much

"We have installed many WESMAR thrusters and recently installed the Vortex on a 55 Fleming Pilot Motoryacht, and we absolutely recommend it."

more power. We have installed many WESMAR thrusters... and we absolutely recommend it."

The Fleming 55 is built to perfection in a boat yard in Taiwan, using over 90 individual molds. When it arrives in Maryland, one of the first things that happens is the WESMAR bow thruster is installed along with other optional equipment such as watermakers, second generators and transducers. This is followed by installation of electronics. Then begins the careful and precise work of sanding, sealing and varnishing the teak, detailing and waxing the interior, exterior and detail-

ing the engine room.

Complete quality and reliability are extremely important to Burr. Just before the decor is installed the boat is taken out for a critical "shakedown" to ensure all the equipment is calibrated, interfaced properly, and performing at stated standards.

The new Vortex came through with great success!
