

Stabilizer & Thruster Customer Report

The Experts Recommend WESMAR Stabilizers

Years ago, Helmut Wegener did not know much about Fin Stabilizers. A rough journey through the Graveyard of the Pacific, West of Vancouver Island, quickly made him an expert.

After reading about WESMAR's fin stabilizers in Yachting Magazine Wegener, long time boater and owner of Precision Replacement Parts in Woodinville, WA, decided to buy the new WESMAR Electronic Gyro Roll Fin Stabilizer. On a recent Sea Trial in Seattle aboard Wegener's boat, the Hessen, he reflected on his decision to purchase the WESMAR.

"This boat really rolls. After my experience up North and reading about WESMAR's stabilizers, I spoke with Dan Franck (of Vic Franck's Boat Co.,

A recommendation from Franck's Boatyard is not taken lightly in Seattle.

Inc.) about Stabilizers, and he recommended the WESMAR."

Vic Franck's installed a WESMAR Bow Thruster on the

The Wegeners are set for their next trip into the Queen Charlotte Islands with their new Fin Stabilizer (with 6 square foot fins) and their WESMAR bow thruster on board their 60' Defever.

Hessen two years earlier--a recommendation Wegener has been extremely happy about. "My wife and I couldn't move the boat without it," he says.

And what do the folks at Vic Franck's think about the new Stabilizer?

Ray Young (a member of Franck's Boatyard for over thirty years) has been installing Roll Fin's for years and he likes the WESMAR Stabilizer. "It's clean in the front. The installation goes real well."

A recommendation from Franck's Boatyard is not taken lightly in Seattle. It's one of the oldest yacht builders in

the country, having launched its first vessel in 1926. The yard has produced almost 250 power and sailboats over the years, and the employees have extensive experience with mechanical marine equipment. Experts like Young know a good product when they see one.

The Hessen is now equipped for the high seas and Wegener can breathe easier when he journeys through the rough seas off Vancouver Island.
