

# **WESMAR Roll Fin Stabilizer & Bow Thruster Package Ultimate Comfort For 65-Foot Sportfisher**

She's home in Costa Rica now, but one of the final steps taken before the AVENGER left San Diego, California, in January, was a sea trial to try out her new Roll Fin Stabilizers and Bow Thruster from WESMAR.

The 65 foot Mikelson Sportfisher held sea trials off Catalina Island and San Clemente north of San Diego. They went very well.

This beautiful vessel, equipped with all the latest electronics,

hydraulic and mechanical gear was built in Taiwan and outfitted in southern California, in preparation for her job as a vessel for corporate clients to sport fish off Costa Rica. She will port at the New Marriott Marina on the West Coast of Costa Rica.

The owners of the AVENGER chose WESMAR stabilizers and roll fin stabilizers for their reliability and rugged design. They wanted stability on the

open seas and close quarters docking capability in port.

"She did fine," said Bill Campbell from Driscoll Shipyards, who did the installation. "It was quite typical, the parts are simple to install. The entire operation went smoothly." Of the sea trials, the crew preparing her for departure said, "the stabilizers and thrusters worked without flaw."
